

New Payments Platform

What is NPP?

The NPP was built using ISO20022. to enable more data to travel with a payment. We use this world class messaging schema to bring payments innovation to life through the Platform, the Fast Settlement Services and Business Services.

Azupay + NPP

PayID

PayID simplifies the payment process by removing the need for your customers to remember credit card, BSB and account numbers.

PayOut

Azupay's PayOut lets you handle time-critical payments, all while eliminating accounts payable errors through automated payment validation.

PayTo

PayTo leading technologies enable initiation and set-up of both one time and recurring digital direct debit agreements with customers in accordance with PayTo consent terms.

Join the innovators modernising their payments with Azupay's real-time solutions
